### **Admin Credentials:**

Email: [admin@example.com](mailto:admin@example.com)

Password: adminadmin

### **User Stories Implemented:**

Feature: Having multiple admins and being able to grant admin privileges to users

As an admin

So that I can give admin privileges to select students

I want to have multiple admins so that I can share admin work among TAs

Feature: Adding a personal email attribute to every student

As an admin

So that I have a non-tamu email address on record.

I want to have an option to contact students after they graduate.

Feature: Being able to change project preferences

As a team leader

So that I can change

I want to have the option of changing our team's project preference

### **Design Diagram for this Iteration:**

Users initially had the following attributes -

Firstname
Lastname
UIN
Email
Year

Semester
Course
Password_digest
Admin (T/F)
Peer_evaluation
Reset_digest
Reset_sent_at

In this iteration, we have added a new attribute (personal email address) for all users. This allows admins to look up students from previous years and still be able to contact them via their non-tamu email address.

**Additional Documentation related to change in User Stories:**

None

**(For Legacy Project) Any User Stories that were rewritten and code refactored:**

None

**Evaluation of code and test (SimpleCov and CodeClimate):**

All newly implemented features have tests written for them. As mentioned earlier, some old and outdated tests were fixed, but there are tens of broken tests in the legacy code that are not succeeding. We are fixing legacy tests whenever we can, but this is not a priority.

**If you were not able to implement all the stories that you initially chose for this iteration, please list which ones and why not:**

The 'Grant Admin Privilege' feature still needs some fix and testing and will be deployed to the heroku link in the next couple days.

**If you have changed any of your stories, please write a short description of the changes made and the reason behind the changes:**

No changes in user stories.
