Heroku Link - https://shielded-plateau-94054.herokuapp.com/

Admin Credentials:

Email: admin@example.com

Password: adminadmin

User Stories Implemented:

1) Feature: Reset Password using link sent via email
   As a student
   So that I have an alternative way to login when I forget my password.
   I want a password reset link to be sent to me by email when I choose the option

2) Feature: Search Bar to Find Student Details using UIN, Name or Team Name
   As an Admin
   So that I can search for a specific student without manually looking through the entire list of students.
   I want a search bar that searches for students using UIN, Name or Team Name matches.

3) Feature: Personal email for students
As an Admin
So that I can follow-up with students even when their TAMU email is inactive
I want to store students' personal email in the DB

Design Diagram for this Iteration:

Changes were not big enough to require a design diagram. However, we followed these lo-fi sketches while implementing features that required UI design:

New Feature - Search and Sort Students

The admin can now search a particular student by UIN, Name or associated Team Name.

Additional Documentation related to change in User Stories:

In the previous iteration, we temporarily changed the password reset user story to reset to UIN. We have undone that change now (since we found the full solution) and the present user story is identical to what was proposed in iteration 0.

(For Legacy Project) Any User Stories that were rewritten and code refactored:

None.

Evaluation of code and test (SimpleCov and CodeClimate):

All newly implemented features have tests written for them. As mentioned earlier, some old and outdated tests were fixed, but there are tens of broken tests in the legacy code that are not succeeding. We are fixing legacy tests whenever we can, but this is not a priority.

If you were not able to implement all the stories that you initially chose for this iteration, please list which ones and why not:

All targets met.

If you have changed any of your stories, please write a short description of the changes made and the reason behind the changes:

No deviations from I0.
